

Industry Insiders Impressed and Excited by Medallion Cabinetry's New Products Unveiled at KBIS 2019

Las Vegas, NV, February 19th, 2019 – Medallion Cabinetry launched several new products at the 2019 Kitchen & Bath Industry Show. Medallion's massive 50x50-foot booth showcased these new products in a dozen kitchen and bath vignettes featuring artistic takes of popular styles, from ultra-contemporary to classically chic, and from richly rustic to luxuriously sleek.

A stand-out introduction was the addition of 23 new Classic Paints, for a total of 38 standard painted cabinetry options. The new colors were selected after exhaustive research and consultation, using top trend forecasting resources and our extensive industry design expertise. Grouped together, all colors now appear as "The Finish Folio: Paint Edition." They will be presented in a portable booklet with magnetic swatches of all paints, giving designers a handy tool to quickly and easily show clients new color combinations.

Another popular addition to the Medallion line up was walk-in pantry cabinetry. This gives designers another choice to achieve a custom aesthetic by masking a walk-in pantry using matching doors which mimic the appearance of tall pantry cabinets.

Other notable new product introductions were two new wood range exhaust hood designs, and shiplap and X-end panel options. Also launched were nine new innovative kitchen storage and organization solutions, including a "charger drawer" which has a built-in electrical outlet for charging portable electronic devices while keeping them tucked neatly out of sight.

"This is the first time we have introduced so many new products all at once, and we're beyond excited to offer all these new options to our designers," said Tom Samanic, President. "We're thankful to have such a visionary product development team whose industry insights allow us to continue as leaders in kitchen and bath design."
